

# RESCUE CENTRE/SHELTER VET REQUIRED

Anicare Veterinary Group Dublin is seeking to recruit a qualified veterinary surgeon with some experience who will be employed as part of the Anicare team but who will work mainly at a local dog rescue centre.

The case load will largely consist of treatment and control of infectious diseases frequently seen in rescue centres, neutering and minor surgical procedures. An interest in shelter medicine, canine behaviour and compassion for the welfare of abandoned dogs is essential.

Whilst the successful candidate will work mainly on site at the rescue centre from 8.30am – 5.30pm Monday to Friday there will be a small amount of weekend and after hours work.
